

**A storage box attached to maintaining standardized shelf in optimal conditions.**

**The storage system protected from moisture, light, dust, to protect and distribute standardized gaskets (PN10 PN20 and) from DN 25 to DN 100 in the most used materials.**

**Innovation is supported and strengthened by a PATENT INPI.**

## Propriétés :

- From DN 25 to 100 PN 10 / PN 20
- Thickness: 0.5 to 5 mm
- Material: Rubber, fiber, graphite, PTFE

## POSSIBILITY IN GRAPHITE SPIRAL

## Avantages :

- Your joints protected from moisture, light, stored on shelf.

## Médias d'applications :

**We reserve the right to modify our products and ranges at any time to improve them.**
