

Sicchem S50 is a product of the family of modified PTFE, highly compressible due to micro glass spheres that compose it.

Sicchem S50 is ideal for delicate connections and wherever the low torques are required. It greatly reduces the problems of loss of clamping and cold flow.

Sicchem S50 provides high chemical resistance and superior performance with PTFE seals.

Sicchem S50 is particularly suitable for sulfuric acid.

Propriétés :

Is used in industry such as chemical, petrochemical, food, pharmaceutical ...

Agréments :

- FDA
- 21 CFR
- JIS Z 2801:2000 (Anti Bacterial)

Avantages :

Color: Blue

Temperatures: -212 ° C to +260 ° C

Pressure: 85 Bar (ep 1.5 mm)

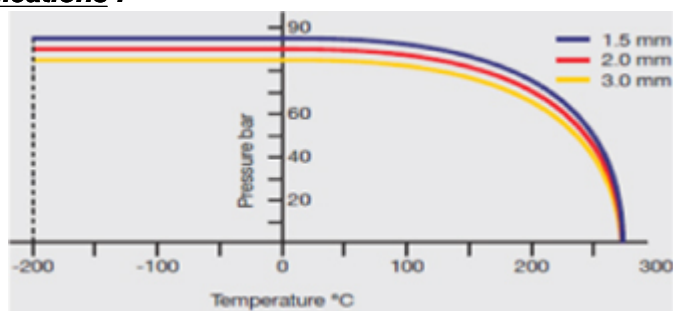

70 Bar (ep 2.0 mm)

60 Bar (ep 3.0 mm)

Dimensions: 1500x1500

Thickness: mm 1/1.5/2/2.5/3.2

Médias d'applications :
